M-Line

M-Line is a high quality product designed for durable applications in facade cladding. They are suitable for special use in horizontal and vertical applications that require particularly high water resistance. The very high pressure and high temperature paper lamination process of M-Line produces an exceptional weather resistant HPL panel for exterior applications to EN 438-6 type EDS / EDF. M-Line offers remarkable structural stability. Common applications include doors, partitions, walls and self-supporting building components.
